GOOD TIMES

OCTOBER '16
NEWSLETTER

Lake Mayfield Campground

by Nan O.

The October camp out was a joint adventure with hosts Nor'West LoWs. We arrived on Monday, October 10th and stayed three nights. The weather was great, at least until we packed up Thursday morning when it started to rain.

OR LoW members attending included Celeste V., Cecil K., Nan O., Gail F., Laverne M. Previous member Judy H. also was there.

Monday evening was the usual potluck with wonderful and varied selections.

Tuesday and Wednesday for lunch most of the group went into town for Chinese food at The Great Wall. Tuesday night Laverne provided an Oktoberfest feast for all of us. Hot German potato salad, brats, sauerkraut, all very good. Desserts included apple pie, pumpkin pie, flavored meringue puffs and carrot cake.

Activities

Weiner races! Yodeling! Eating! Games and Puzzles, Oh my.

Ce

Celeste's birthday was celebrated

There was so much food left over we did it all again on Wednesday night. Thanks Laverne!

Our business meeting was held on Wednesday. Unfortunately, my dog ate my notes but there was not much discussion. Cecil is working on the schedule and it will be provided shortly. Under consideration is eliminating the final (October) campout each year. A vote will be taken next year.

IMPORTANT INFORMATION ABOUT WINTER LUNCHEONS:

THEY WILL CONTINUE TO BE ON THE 3RD TUESDAY OF EACH MONTH EXCEPT FOR DECEMBER BUT THE LOCATION HAS NOT BEEN DETERMINED YET. DOROTHY IS WORKING ON THE LOCATION AND WILL EMAIL SAME TO THOSE WITH EMAIL AND SNAIL MAIL THOSE WITHOUT EMAIL.

To setup a document for multiple column text, on the **Page Layout** tab, in the **Page Setup** group, click **Columns** and then click the number of columns you need. You can also click **More Columns** to specify column widths, the space between columns, or to automatically add a vertical line between columns.

To change the number of columns for just part of the document (or if you want text to wrap to just the top part of the page and a new article to start below – as shown on this page), insert a section break before the position where you want to start the new column layout. To do this, on the **Page Layout** tab, in the **Page Setup** group, click **Breaks** and then click the type of section break you need.

Select a section break

When changing many types of page layout formatting for just part of the document—such as paper size, margins, or orientation, the best section break type to use is a **Next Page** section break because it automatically starts the new section on a new page. However, when changing the number of columns as you might in this newsletter, you may prefer to select a **Continuous** break. The continuous section break (used a few times throughout this template) starts a new section immediately after the preceding one. So, for example, you can have a three-column article followed by a four-column article, on the same page.

Formatting Tips

HEADING 4

Sidebar Setup

The sidebars in this template use simple, single-row tables for the gray-shaded headings and thermometer charts shown below for easy alignment.

Add Sidebar Content

Adding content into a column to create a sidebar is no different from adding text. As noted earlier in this template, apply the styles provided for headings, sidebar text, and even pictures to align them quickly and easily.

Caption 2 style is used to add picture captions. Captions are in text boxes for easy placement relative to images.

This placeholder article provides the following tips:

- Creating “thermometer charts” using tables, as shown at left.
- Setting up multipage articles.
- Wrapping text around images
- Adding article titles and bylines

Creating the sidebar thermometer charts

When you work in Word 2010 (or PowerPoint 2010), you have the full power of Excel 2010 charts (provided that Excel is installed on your computer). Insert a chart in Word from the **Insert** tab, in the **Illustrations** group. Charts are easy to create and use and automatically coordinate with your active document theme.

However, notice in the sidebar at left that the “thermometer charts” were created using single-row Word tables. This is because they automatically fit the tight space without having to remove any chart elements. And you might be surprised to learn that it’s easy to make them essentially mathematically accurate.

To use a table as a thermometer chart, do the following:

1. On the **Insert** tab, in the **Tables** group, click **Table** and then drag across the grid to select the first two cells in the first row. Click to insert a two-cell, one-row table.
2. Click in the table and then, on the **Table Tools Layout** tab, in the **Table** group, click **Properties**.
3. On the **Columns** tab of the **Table Properties** dialog box, change the **Measure In** setting to **Percentage**. You can then set the percentage to up to one decimal point in accuracy.

Setting up multipage articles

Word is designed to allow text to automatically flow from one page to the next. So, when you want an article to continue on the next page, just keep typing.

In the case of this placeholder article, it is separated into two placeholder content controls (one on this page and another that starts at the top of the following page) just so that you can still see the layout of the following page while you begin adding your own text on this page. As mentioned on the first page of this template, remember that it might look like the layout is skewed when you replace a long piece of placeholder text by starting to type your own, but it is not. As you add your content, the layout that follows will move down automatically and back into position.

To remove the second placeholder control that starts immediately following this one, just select it and then press any key. You can then continue typing from this page and your text will automatically flow onto the next.

Wrap text around images

The photos in this article that are angled with white borders are “floating” images. That is, they are setup for text to wrap around them—which is why they can span multiple columns in a three-column section. Additionally, as mentioned earlier, the photo of the young woman in the body of this article is set to wrap text so that text will flow around the image as you add your own text.

To select text wrap settings, start by selecting the image and then do the following:

1. On the **Picture Tools Format** tab, in the **Arrange** group, click **Wrap Text** and then select either **Square**, **Tight**, or **Top and Bottom**—depending on how you want the text to wrap.

You might be happy with the default behavior as soon as you do this. Otherwise, continue to step two for customization options.

2. To set a specific position or control behavior (such as whether or not the image moves with text), on the **Picture Tools Format** tab, in the **Arrange** group, click **Position** and then click **More Layout Options**.
 - On the **Text Wrapping** tab of the **Layout** dialog box, you can set a specific distance from the image for text to wrap and control whether text can wrap on both sides, one side only, or just above and below the image.
 - On the **Position** tab of that dialog box, you can set a specific position for the image on the page and select or clear the option to allow the picture to move with text.

Adding article titles, bylines, and dividers

The article titles and bylines for this newsletter are created in text boxes. This is because text can wrap around a text box just like it can around a picture. Similarly, the orange divider bars that you see on pages containing more than one article are shapes set to wrap text. So, these text boxes and shapes can easily span multiple columns without having to insert a section break or change the number of columns for just that portion of the page.

When you select a text box or a shape, on the **Drawing Tools Format** tab, in the **Arrange** group, you have the same settings for text wrapping and positioning that are described above for wrapping text around pictures.

Note that, because text is set to wrap around the orange divider bars, your article might appear to slip below or above a bar, depending upon length. To adjust the position of a divider bar shape to accommodate the length of your articles, just select the shape and then use the up and down arrow keys on your keyboard to nudge it to the proper position.

Notice the image of the young woman that's within a text column on the preceding page. The background has been removed from that image to allow text to wrap directly around the subject.

Office 2010 introduced several new and improved picture formatting tools in Word, PowerPoint, and Excel. Among those is the Remove Background tool that you can use to remove backgrounds from your own images, similar to the sample image on the preceding page.

To do this in Word, first insert your image into the document (on the **Insert** tab, click **Picture**), and then select it. Then, on the **Picture Tools Format** tab, in the **Adjust** group, click **Remove Background**.

The Remove Background feature automatically displays what it believes to be the central subject of the image. However, it's easy to adjust this if the immediate result is not what you need.

On the **Background Removal** tab, click **Mark Areas to Keep** or **Mark Areas to Remove** and then drag your mouse pointer in a line across the portion of the image you want to add or remove. When you are finished making adjustments, click **Keep Changes**.
